

# PE WAX 9118

## TECHNICAL DATA SHEET

Chemical Formula :  $(C_2H_4)_n$   
Cas No. 9002-88-4

### Description

The product is white powder, uniform in appearance and characteristics, in line with the standard. High melting point, low viscosity, strong lubricating function

### Applications

Widely used in PVC products, Lead, calcium zinc composite stabilizer, Hot melt adhesive, Road marking paint, Powder coating, Filling masterbatch

### Packaging

Packed in 25 kg paper plastic composite bags or woven bags and transported in the form of pallets, 40 bags for each pallet, with a net weight of 1000 kg. It is packed in extended packages outside.

No.	ITEMS DESCRIBE	INDEX
01	Softening Point $^{\circ}C$	100-105
02	Viscosity CPS@140 $^{\circ}C$	5-10
03	Density g/cm <sup>3</sup> @25 $^{\circ}C$	0.92-0.95
04	Appearance	White Powder
